

## AI Project

Meeting started: Nov 19, 2024, 5:00:14 PM

Meeting duration: 61 minutes

Meeting participants: Agita Ferstere, Diāna Koržaviha, Natalja Krjučkova, Sergejs Kopils

### Quick summary

During this meeting, Natalja, Sergejs, Agita, and Diāna discussed the progress and challenges of their coding project, focusing on data processing and risk assessment for companies. They addressed issues with code execution, data sorting, and the integration of different data sources. The team also planned next steps, including testing and refining their algorithms.

### Action items for Natalja

- Attempt to run the code on Belgian companies to test the results.
- Work on refining the risk assessment algorithm based on the results from Sergejs and Diāna.
- Coordinate with Agita to finalize the logic for risk assessment.

### Action items for Sergejs

- Finalize and upload the updated code to GitHub.
- Test the code with the 300 companies provided by Diāna.
- Share the results with the team for further analysis.

### Action items for Agita

- Collaborate with Natalja to review and improve the risk assessment logic.
- Ensure the integration of all data sources and criteria into the final code.

### Action items for Diāna

- Provide the team with the 300 companies' data and test results.
- Investigate and address any issues with the code execution on larger datasets.
- Communicate any additional findings or challenges to the team.
