

AI Project

Meeting started: Nov 6, 2024, 5:01:36 PM

Meeting duration: 61 minutes

Meeting participants: Agita Ferstere, Diāna Koržaviha, Natalja Krjučkova, Sergejs Kopils

Quick summary

During this meeting, Sergejs, Natalja, Agita, and Diāna discussed the challenges and progress related to a project involving company data analysis and web scraping. They explored various methods to improve data collection and analysis, including using different search engines and APIs, and considered the integration of language models for better data interpretation. The team also planned their next steps and scheduled a follow-up meeting to review progress.

Next Action:

- **Natalja:** Continue working on extracting text from links and exploring public registries.
- **Sergejs:** Work on analyzing extracted text using Large Language Models.
- **Diāna:** Explore public registries and other sources to determine company activity status.
- **Agita:** Assist with data extraction and analysis, focusing on trusted sources.
- **Everyone**
 - Meet again on Tuesday at 5 PM to discuss progress
 - Consider limiting search to specific websites known for negative information
 - Test different approaches for extracting and analyzing company data
 - Review and refine the list of companies and sources for accuracy
 - Ensure the code is functioning correctly and efficiently
 - Prepare for the next meeting with updates on assigned tasks

Conclusion

The meeting concluded with a plan to explore new methods for data extraction and analysis, with each team member assigned specific tasks. The next meeting is scheduled for Tuesday 12/11/2024 5 PM to review progress and discuss further steps.
