

AI Project

Meeting started: Dec 4, 2024, 4:59:37 PM

Meeting duration: 71 minutes

Meeting participants: Agita Ferstere, Diāna Koržaviha, Natalja Krjučkova, Sergejs Kopils

Quick summary

During the discussion, the participants talked about the difficulties associated with completing the task. They discussed the use of various tools and methods for data analysis. Issues related to data preparation and processing were also discussed. At the end of the meeting, the participants agreed on further steps and deadlines for completing the tasks, as well as the need to meet to discuss the results and adjust the approach.

Next Action:

- **Sergejs:**
 - Run and verify the Python script provided by Agita.
 - Ensure the script produces the expected output files.
- **Natalja:**
 - Aggregate the scores from the evaluation steps into a final result.
- **Diāna:**
 - Optimize the web scraping process.
- **Agita:**
 - Continue refining the Python script and assist team members with any technical issues.

Meetings and Deadlines:

The team plans to meet again after December 14th to review progress
